Excellence in Results Driven Business Intelligence, Data Science and AI/ML , RAG, Vision and Automation

2019 → 2020 → 2021 → 2022 → 2023 → 2024 → 2025

Pre-DS Engagement:

- Management of Taxi business
- Business analytics
- Profitability improvement actions

Maharishi International Residential

Data Science activities

- Business Analytics
- Machine Learning
- Data acquisition understanding
- Data cleaning
- Explanatory Data analysis
- Feature Engineering

Sai University

AI/ML, RAG, Vision and LLMs

- OpenCV, MediaPipe
- CLIP, LLaVA, LLaMA
- Gemini, Groq, Prompt engineering
- API Integration
- Retrieval Augmentation Generation
- AI-driven Automation Pipelines

Flex Summer Internship

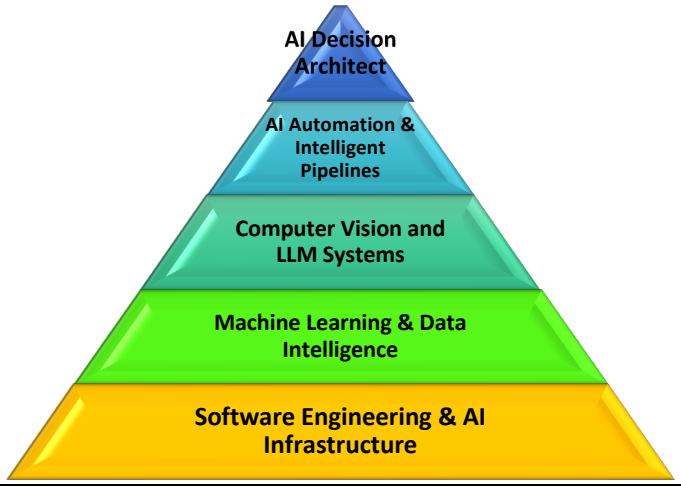
Industry Experience Highlights

Flex - AI Automation Intern (Summer 2025)

Flex is a Global Electronics Manufacturing Services Company

- Built internal AI automation tools for document and workflow processing
- Deployed tools via API-based services and Gradio interfaces
- Worked with OpenCV, CLIP, PyMuPDF, Tesseract, Gemini/Groq APIs
- Integrated OCR, Computer Vision, and LLM components into end-to-end pipelines
- Focused on production concerns: reliability, latency, modularity, and usability
- Collaborated with engineers to iterate on models and pipeline performance

Core Competency:



Education

Secondary School

Maths
Science
Social
English
Tamil

Higher Secondary

Maths
Physics
Chemistry
Computer science

B.Tech: Sai International University

Computing & Data science

Honors:

- **Flex Internship** - 3 rd largest electronics manufacturer in the world
- Built **production grade AI systems** for Flex
- Managed family business operations generating **₹14L annual revenue**
- Indian National Olympiad
- Junior CXO , CEO Leadership Program – Certified
- Certfied in base level Robotics
- Built multi-stage pipelines combining **Computer Vision + LLMs + APIs**
- Improved document workflow automation using **OCR + Vision models for Flex**
- Designed and deployed 4 end-to-end AI systems

Programming

- Python , C , C++
- SQL
- R programming / next.js
- Data Structures & Algorithm
- API / Multithreading / Async Programming
- JSON / Data Processing
- Pandas / NumPy

AI/ML/ Vision

- Machine Learning , Deep Learning
- Computer Vision (Open CV , Mediapipe)
- Vision Language Model (CLIP,LLaVA)
- Retrieval AUgmented Generation (RAG)
- Language Model - LLaMA
- Prompt Engineering
- Attention Models / Transformers
- Embeddings & Vector Search

Tools & Digital Transformation

- API & SDK Integration
- Gradio
- OCR (Tesseract , PyMuPDF)
- Git & GitHub
- Docker , Render , HuggingFace
- Data Visualization (Matplotlib, Seaborn)
- Business Intelligence Tools
- KPI & Data Analytics

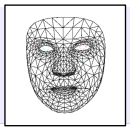
Interpersonal

- Team Leadership
- Project Management
- Analytical Thinking
- Technical Communication
- Strategic Planning
- Cross-Team Collaboration

◆ FEATURED PROJECTS ◆

Attention Sense AI — Real-Time Attention Monitoring System.

Computer Vision · LLM Reasoning · Real-Time AI Pipeline



MediaPipe Face Mesh **OpenCV** **Gemini / Groq** **Gradio**

- **Real-time face mesh tracking** — monitors eye position, head pose, blink rate, and distractions (sleeping, turning right / left) using MediaPipe + OpenCV
- **Multi-signal attention scoring** — fuses gaze direction, blink rate, and head orientation into a unified live focus metric
- **LLM reasoning layer** with Gemini / Groq generates contextual alerts and attention reports from raw CV signals
- **Deployed via Gradio** — applicable in online meetings, classrooms, and workplace focus monitoring scenarios

Document Analyzer — Intelligent OCR + Vision + RAG Pipeline

Multi-Stage Document Intelligence · Structured Extraction · LLM Q&A

Tesseract OCR **PyMuPDF** **OpenCV + CLIP** **LLaVA + LLaMA (RAG)**

- **Multi-stage OCR → Vision → LLM pipeline** that extracts all content from documents into structured, queryable chunks
- **Visual element extraction** using OpenCV + CLIP to isolate signatures, tables, and diagrams from raw document images
- **RAG-based Q&A** powered by LLaVA + LLaMA — query like "Width of HD78DS9 part?" and get precise answers even from inside diagrams
- **Eliminates manual document scanning** — designed as an end-to-end automation pipeline for enterprise document workflows

Resume Flow AI — Intelligent Resume Parsing & Interview System

End-to-End Recruitment Pipeline · Scalable Batch Processing

Web Link : https://resumeflow-ai-sable.vercel.app

LLM Extraction **JD Matching** **Fit Scoring (out of 10)** **Interview Generation**

- **End-to-end resume intelligence** — extracts skills, experience, projects, and gaps from any resume automatically using LLM
- **JD-vs-resume fit scoring** (out of 10) with detailed skill gap analysis against a provided job description
- **Personalized interview generation** — each question set is tailored to the individual candidate's actual resume content
- **Scalable pipeline architecture** — batch-process multiple resumes, rank by fit score, and surface best matches for any role

Supply IQ — AI-Powered Supply Chain Intelligence Platform

Full-Stack AI Product · Fast API + Next.js · Deployed on Render

Web Link : https://supply-iq-nu.vercel.app/ - workspace

Prophet Forecasting **Isolation Forest** **RAG + TF-IDF** **Groq LLaMA 3.3 70B** **Fast API + Next.js**

- **30-day demand forecasting** using Prophet + Isolation Forest for anomaly and supply risk detection with scoring (LOW / MEDIUM / HIGH)
- **RAG-based Contract Intelligence** — indexes supplier PDFs via TF-IDF + cosine similarity and answers custom business queries
- **Executive Decision Engine** powered by Groq LLaMA 3.3 70B combining forecast, anomaly, and contract data into VP-level decision reports
- **Production-grade full-stack app** — multi-session Fast API backend, glass morphism Next.js UI, deployed live on Render
