## Excellence in Results Driven Business Intelligence, Data Science and AI/ML , RAG, Vision and Automation

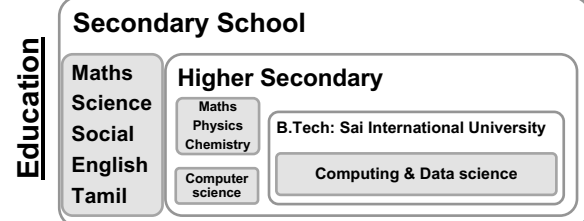

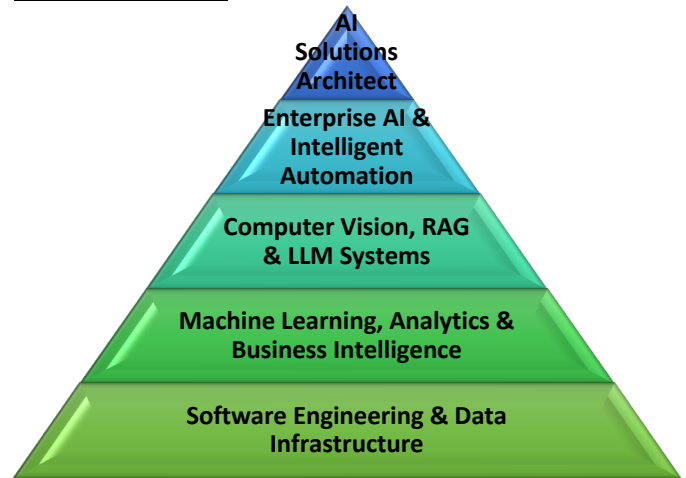

## Industry Experience Highlights

### Flex - AI Automation Intern (2025)

### DMW CNC Solutions – AI, Digital Transformation & Systems Intern (2026)

## Core Competency:

## Honors:

## Programming

- Python , C , C++
- SQL
- Javascript / next.js
- Data Structures & Algorithm
- API / Multithreading / Async Programming
- JSON / Data Processing
- Pandas / NumPy

## AI/ML/ Vision

- Machine Learning , Deep Learning
- Computer Vision (Open CV , Mediapipe)
- Vision Language Model (CLIP,LLaVA)
- Retrieval AUGmented Generation ( RAG )
- Language Model - LLaMA
- Prompt Engineering
- Attention Models / Transformers
- Embeddings & Vector Search
- AI Agents & Tool Calling
- Enterprise Knowledge Retrieval

## Tools & Digital Transformation

- API & SDK Integration , Gradio
- OCR ( Tesseract , PyMuPDF)
- Git & GitHub
- Docker , Render , HuggingFace , BI tools
- Data Visualization (Matplotlib, Seaborn)
- Workflow Automation Systems
- Enterprise Process Digitization
- Compliance & Audit Management Systems
- Business Intelligence & KPI Analytics

## Interpersonal

- Team Leadership
- Project Management
- Analytical Thinking
- Technical Communication
- Strategic Planning
- Cross-Team Collaboration

## ◆ FEATURED PROJECTS ◆

### Attention Sense AI — Real-Time Attention Monitoring System.

Computer Vision / LLM Reasoning / Real-Time AI Pipeline / MediaPipe- Face Mesh / OpenCV / Gemini / Groq / Gradio

- ▶ **Real-time face mesh track ing** — monitors eye position, head pose, blink rate, and distractions (sleeping, turning right / left ) using MediaPipe + OpenCV
- ▶ **Multi-signal attention scoring** — fuses gaze direction, blink rate, and head orientation into a unified live focus metric
- ▶ **LLM reasoning layer** with Gemini / Groq generates contextual alerts and attention reports from raw CV signals
- ▶ **Deployed via Gradio** — applicable in online meetings, classrooms, and workplace focus monitoring scenarios

### Document Analyzer — Intelligent OCR + Vision + RAG Pipeline

Multi-Stage Document Structured Extraction (RAG) / LLM Q&A Tesseract OCR / PyMuPDF / OpenCV + CLIP / LLaVA + LLaMA

- ▶ **Multi-stage OCR → Vision → LLM pipeline** that extracts all content from documents into structured, queryable chunks
- ▶ **Visual element extraction** using OpenCV + CLIP to isolate signatures, tables, and diagrams from raw document images
- ▶ **RAG-based Q&A** powered by LLaVA + LLaMA — query like "Width of HD78DS9 part?" and get precise answers even from inside diagrams
- ▶ **Eliminates manual document scanning** — designed as an end-to-end automation pipeline for enterprise document workflows

### Resume Flow AI — Intelligent Resume Parsing & Interview System

End-to-End Recruitment Pipeline / Scalable Batch Processing / LLM Extraction / Fit Scoring (out of 10) / Interview Generation

Web Link : <https://resumeflow-ai-sable.vercel.app>

- ▶ **End-to-end resume intelligence** — extracts skills, experience, projects, and gaps from any resume automatically using LLM
- ▶ **JD-vs-resume fit scoring** (out of 10) with detailed skill gap analysis against a provided job description
- ▶ **Personalized interview generation** — each question set is tailored to the individual candidate's actual resume content
- ▶ **Scalable pipeline architecture** — batch-process multiple resumes, rank by fit score, and surface best matches for any role

### Supply IQ — AI-Powered Supply Chain Intelligence Platform

Full-Stack AI Product / Fast API + Next.js / Deployed on Render / Prophet Forecasting / Isolation Forest / RAG + TF-IDF / LLaMA 3.3 70B

Web Link : <https://supply-iq-nu.vercel.app/> - workspace

- ▶ **30-day demand forecasting** using Prophet + Isolation Forest for anomaly and supply risk detection with scoring (LOW / MEDIUM / HIGH)
- ▶ **RAG-based Contract Intelligence** — indexes supplier PDFs via TF-IDF + cosine similarity and answers custom business queries
- ▶ **Executive Decision Engine** powered by Groq LLaMA 3.3 70B combining forecast, anomaly, and contract data into VP-level decision reports
- ▶ **Production-grade full-stack app** — multi-session Fast API backend, glass morphism Next.js UI, deployed live on Render

### KPI Insights Visualizer – Analytics Platform

Multi-plant Performance monitor / KPI analytics via BI / Python / Pandas / Plotly / HTML / Excel to Html / 8+ plant . 120 + KPI . 3000+ data Visualization

- ▶ **Automated KPI generation** --- from workforce and operational datasets across multiple manufacturing plants and departments.
- ▶ **Developed interactive dashboards** --- tracking absenteeism, target achievement, profitability, productivity, and department-level performance.
- ▶ **Enabled plant-wise and department-wise benchmarking** --- through automated analytics and visual reporting.
- ▶ **Replaced manual Excel** analysis with a centralized management insights platform for decision-making.

### Internal Audit Management System

Workflow Automation / Manufacturing Compliance / On-Premise AI Assistant Internal Audit Management System (Ollama 70B) / KPI Analytics / Knowledge Retrieval

- ▶ **Developed an Internal Audit management System** from starch for **DMW CNC solution** with over 500 employees and 400 cr turnover , This system is used by auditors and auditees across multiple plants , department and compliance standard.
- ▶ **Automated the complete audit lifecycle** including annual planning , checklist generation , NCR management , corrective actions , repeated NC detections and management review report.
- ▶ **Plant and Department wise analytics dashboard** providing insights into NC trends , adherence% , repeat NCs , closure effectiveness , auditor utilization, and compliance performance.
- ▶ **Integrated Ollama 70B model in this system** that runs continuously on the enterprise server , enabling users to query about the audit data , plant performance ,NCR history , compliance clauses, and even machine manuals.
- ▶ **Developed an enterprise level knowledge retrieval system ( RAG )** that automatically search all the manuals records, compliance, audit details, KPI performance reports and provide conceptual answer ,explanation ,guidance and insights.
